The August 17 meeting will be a discussion of the Girl Scout Big Event and how the club can help.

August 6 10AM - 4PM Rocks, Slabs and Cabs SWAP in the Craft Center

ANNOUNCING the SHOW

By now, all of you must know that the club show is September 9th, 10th and 11th. This is the **major fundraiser** for the club and we need **EVERYONE'S HELP** to make it a success. Debby will be contacting you this month to ask you to give two hours of your time. Please be ready to help.

WEBMASTER: We are still looking for a permanent webmaster for the club. The webmaster is responsible for the design/maintenance/update of the club's website: rockyreader.com, posting Rocky Reader to the website and sending all correspondence originating from newsletter2015-1@rockyreader.com.

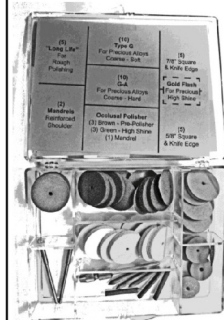

PRESIDENT'S MESSAGE

On Thursday, while I was busy doing the Ann Arbor Art Fair, a call came to my home to inform me that the craft center was having an electricity problem. My son immediately called Carol Grey at the Toledo Botanical Garden Office to report the problem. If you are experiencing problems at the craft center during the normal working hours of the botanical garden (M-F: 9-5) PLEASE notify Carol Grey in the office. You can even call her at 419-536-2039. If you would also let me know the nature of the problem, I will be sure that the appropriate work orders are filed.

CASES, CASES, CALLING ALL CASES!!!!

It's time to start thinking about putting in a display case at our show in September. This is our biggest opportunity to show the public what the club is about and what we do. The case sizes are: Club case - 48"W x 30"D x 12"H and new cases - 48"W x 30" D x 22 3/8"H Club

PLEASE HELP THE UNIVERSITY OF TOLEDO WITH A MINERAL EXHIBIT FOR THE LIBRARY

We are putting together a mineral exhibit in Carlson Library at the University of Toledo to run through the 2016-2017 school year. Most of our materials will come from the Department of Environmental Sciences, but I would like to ask if any club members might be willing to loan some of their material (minerals, fossils, decorative stones) to the exhibit for the school year. It is important to note that the cases are very large and it takes two strong people to remove each of the glass case fronts, so once they are closed they will not be opened again until May of 2017. We plan to put materials in the cases by about August 15, so we would need to have them here before that date. I know that this is a long time commitment, but some of our members have beautiful material that would be wonderful to share, and perhaps it is just sitting packed away in boxes anyway.

I thought this might be a nice opportunity to promote the Toledo Gem and Rockhound Club, as we would indicate on each label, whose collection the specimen came from, and the person's membership in the club. Please know that all material will be handled with the utmost care, since I understand the value of these one-of-a-kind items. We are mainly looking for eye candy, something that is colorful and/or an unusual form, which is attractive to people who might not know much about minerals or stones. The main criterion is that it catches the eye.

Also, if anyone would be interested in a smaller and shorter term commitment, I thought it would be wonderful if we could have a small display in the lobby of the library, to be rotated out periodically (maybe monthly), as an enticement to visit the fifth floor display. We have a smaller Lucite case on a

large pedestal with in internal measurement of 16" by 32" with a usable height of about 23 ½". We could also put business contact information in the smaller case, if desired. The display must be mineral related; if it is jewelry, please be sure that it contains some genuine stone.

If anyone is willing to be a part of the exhibit, I would ask that they provide the proper name of the mineral or fossil, and the location from which it came (if known). This will help us create proper labels for each item. All specimens will be catalogued and photographed as received with the owners name and contact information, and handled with the utmost care to prevent any damage or loss.

Acknowledgment to the owner of specimens on loan to the library will be included on the display label, unless the owner wishes to remain anonymous. Specimens will be locked in cabinets for display until May 2017, at which time they will be returned to their respective owners. The cabinets are very difficult to open and close with frequency, so it will not be possible to remove your material before May 2017 when the exhibit is taken down.

If you are interested in lending specimens to this exhibit, please contact Ruth Jacobs, Carlson Library, The University of Toledo, Mail Stop #509, 2801 W Bancroft St, Toledo OH 43606-3390
Phone: 419-530-2617, e-mail: Ruth.Jacobs@utoledo.edu

TOLEDO GEM AND ROCKHOUND CLUB MEETING MINUTES

Date: July 20, 2016

Meeting was called to order by acting President Mike Mayers

Debby sent an apology for the mix up of the club meeting date. We realize that it inconvenienced many and we are sorry. Debby now has a way to transfer the Google calendar DIRECTLY into the newsletter so this will not happen again.

Pledge of Allegiance

Due to technology problems, there was no program

Secretary's Report: Minutes approved as written. Motion by Tom Marok, and seconded by John Capuano

Treasurer's Report: Treasurers Report Approved Motion to approve by Tom Marok,, seconded by Amy Shufeldt. Shirts, sweatshirts and tote bags are in for pick up.

New Business

A) Girl Scout BIG event : Board asked a representative to speak at a club meeting. Aug 17- Natalie Vorst, Program and Partnership Manager, Girl Scouts of Western Ohio will be our speaker.

B) Board approved purchase of new tables for craft center. Pete investigating costs and availability.

C) No significant correspondence

D) Pete checking on costs of new CC tables, per board directive.

E) Arts in the Gardens moved back to September. If the club participates, can have as many sales persons, as we want, covered under club \$50 entry fee. You have to register with TBG but fees covered under club fee.

Old Business: none

Group Reports:

Fieldtrips (Harold): trip to Canada in the planning stages. Harold can email info to anyone interested; contact Harold by email if interested. Trip will be Sept 17. through 24

Open House: (Nancy): still collecting money through club raffle ticket table. Open House will be in November, right before Christmas

Monthly Beaders (Nancy): Working on gorgeous projects. Third Monday of every month 6pm -8pm. Members can drop in with their projects or work on materials and patterns provided by Nancy

Rocky Reader (Debby): deadline midnight Monday, July 25

Metalcrafters (Debby) - meeting Aug 7, 11, 21, 25. Please e-mail if attending.

Sunshine (Joe): Nothing to report

Extreme Beaders (Kathy): Meeting as scheduled in the RR. Tuesdays 9AM -4PM. Need to bring own project and materials

Faceters (Elie): Elie needs to know who wants to participate, and then a date will be established. Contact him if interested. Chet doing small group faceting second weekend, Saturday and Sunday, of the month. Contact him if interested.

Juniors (Steve): Fourth Sunday of the month: Talk on fossil fish collecting on the 24th

Membership (Steve): 30 in attendance, including one junior and one new member, Quentin Skrabec

Gardens (Chet): Plant sale and Jazz nights need volunteers. Contact volunteer coordinator Nicci with TBG

Show (John): Aug 6 will be another workday to make grab bags for children starting at 9 AM; same day as swap day at the cc. We Need toys for kid games

Next Meeting Aug 17- Natalie Vorst, Program and Partnership Manager, Girl Scouts of Western Ohio will speak about how we can help the Girl Scouts

Snacks - No snacks

Adjourn - Motion to adjourn by Tom Marok; Ed Reynolds seconded. Meeting adjourned at 7:43PM

Respectfully submitted, Kathy Petersen, Temporary Club Secretary

CLASSES

Aug 13 & 14. Introduction to Faceting. Instructor Chet King (419-841-4272). Chet will take up to TWO people for this short introduction.

Aug 27 Gemcrafter class. Contact Bonnie Wheeler b86fiero@buckeye-express.com for more information

November 19-20, 2016. Ronda Returns! - two spaces left - (Brought to you with proceeds from the metalcrafter auction) Ronda Coryell (www.rondacoryell.com) returns for another fantastic workshop. This time the projects will be two rings and a hollow bead. The workshop price is \$300 with substantial discounts for early registration, work at the club show and donation to the metalcrafter auction. E-mail Deb Hoffmaster (debhoffmaster@gmail.com) for details and a registration form.

GARDEN NEWS

August 4, 2016 6:30 pm - 8:30 pm Jazz in the Garden

August 7, 2016 9:30 am - 12:00 pm Sunday Short Hort Robert J. Anderson Urban Agriculture Center and Farm, Toledo Ohio

August 11, 2016 6:30 pm - 8:30 pm Jazz in the Garden

August 17, 2016 6:00 pm - 8:00 pm Weed & Wine Robert J. Anderson Urban Agriculture Center and Farm, Toledo Ohio

August 18, 2016 6:30 pm - 8:30 pm Jazz in the Garden

August 25, 2016 6:30 pm - 8:30 pm Jazz in the Garden

FACETEERS

Chet King will do introductory classes on the SECOND weekend of each month. Chet will take up to two people for this short introduction. Call Chet (419-841-4272) for more information. Otherwise, contact Elie Ghanime 419-450-0160, eghanime@buckeye-express.com for more information about faceteers or to schedule training.

FIELD TRIPS

A field trip to the Sudbury Region of Canada is planned for September. Contact Harold Burleson hburle@msn.com or haroldburleson12@gmail.com to be informed of future field trips. Many quarries now require up to date Mine Safety training for admission.

BEADERS

The Beaders meet on the third Monday of the Month at 6PM. If you are interested in beading, contact Nancy Grove nancy7536@att.net for more information.

EXTREME BEADERS

The Extreme Beaders meet on Tuesdays beginning at 9AM. Participants must be able to work independently on their own projects. If you would like to join, but need instruction, contact Kathy Petersen mlrlyt@AOL.com for more information.

GEMCRAFTERS

THANK YOU CHET KING!! For your continuous and very generous support of the Gem Crafter Group. Come ask us what Chet has done lately :)

We are proud to announce the acquisition of a THREE HEADED SPHERE MAKING MACHINE!! After ten years of hearing members voice their wishes for one it's finally here, as promised. We will be ordering the diamond grinding cups shortly and will begin training as soon as possible. THANK YOU CHET KING, JEFF WHEELER, AND GREG FEIGHT for making this wish come true.

INTRODUCTION TO CABOCHON CREATION TRAINING: Due to summer vacations a class is not scheduled for August. We will schedule training upon request. Please contact Natalie at Natalie.Hill.Designs@gmail.com for information.

THANK YOU PETE AND KATHY PETERSON!! For going above and beyond in ordering club shirts, badges and tote bags AND spearheading the acquisition of new tables for the craft center.

JUNIORS

Enjoy your school vacations, go find rocks! For more information, contact Steve Shimatzki - sjs132@gmail.com.

METALCRAFTERS

We will meet August 7, 11, 21 & 25. Sunday meetings are from 1:30-3:30 except the third Sunday when we meet from 12-4. Thursday meetings are from 6:30-8:30. Please confirm your attendance by e-mailing Debby at least 24 hours in advance and pay the \$2.00 session fee. Please wear long pants and sturdy shoes (no sandals) to all metalcrafter meetings.

We are a collaborative group. We expect that members have their own materials and sufficient experience to work independently. If you are new to silver work, please register for one of the beginning pendant classes. If you are new to the group, but have previous experience please e-mail me (debhoffmaster@gmail.com) to arrange orientation during a scheduled meeting. For more information, contact Debby Hoffmaster, moderator, debhoffmaster@gmail.com

Click on Calendar and then on the month you are interested in from the list at the left.

TIGER EYE HISTORY & FACTS:

First of all, tiger's eye, tigereye, tiger eye and tiger-eye are all accepted ways to write this name.

Tiger's Eye is a durable quartz composite with the usual quartz hardness of 7. It begins as the fibrous blue mineral called crocidolite, which is comprised of iron & sodium. Most of us know crocidolite as asbestos. The transformation begins when quartz becomes imbedded between the fibers of crocidolite. This process will result in one of two gemstones. A blue stone is called Hawk's Eye or the golden brown stone called Tiger's Eye.

During the process, the asbestos is completely dissolved. But the quartz takes on the fibrous formations and the blue color of crocidolite.

This creates the parallel lines within the gem which gives it that ever shifting play of light and movement the stone is so loved for. This is also known as chatoyancy, the gleam that rolls across its surface, much like the eyes of a cat.

Even though the iron & sodium dissolve, traces of hydrated oxide of iron deposit between the crocidolite and quartz, creating the golden color that is common to Tiger's Eye. How much of this hydrated mineral is deposited will determine how Golden brown, red, green or blue, Tiger's Eye and Hawk's Eye will be. The rarer blue Hawk's Eye will have only the slightest amounts. The varying amounts of hydrated oxide of iron, actually cause several colors and mixes of color. When the color is a greenish gray, it is called cat's-eye quartz. A golden yellow reflection on a brown stone, is called Tiger's Eye. If the stone is blue gray or bluish, it's known as Hawk's Eye. Reddish brown, or mahogany colored stones, are known as bull's-eye or ox-eye.

Up until recently tiger eye has been considered to be pseudomorph but new evidence proves otherwise. It has long been thought that the crocidolite fibers were replaced with quartz much like the

replacement that happens in petrified wood. New evidence proves this may not be the case and that quartz and the crocidolite co-exist.

Tiger eye has a fibrous structure and in the lapidary shop must be oriented properly to get the chatoyancy and/or the "cats eye" effect. Cuts must be exactly parallel to the length of the fibers to get the full chatoyancy. If the saw cut is perpendicular, or 90% to the fibers, you end up with a lifeless, dark brown to black stone with no chatoyancy or light play at all. Orientation of cutting is critical to getting good chatoyancy and color out of tiger eye.

These fibers in Tiger Eye may be up to about two inches long and very thin. Most are only 0.001 millimeters, or 0.000039 inches in diameter and are not always straight making it even harder at times to cut good chatoyant stones.

TREATMENTS: In most cases, but not always, red tiger eye is not a natural occurrence. It is usually the result of heating and can be done using the kitchen oven. Here's a basic recipe for heat treating tiger eye. To protect the tiger-eye from thermal shock during heating, cover slabs of ordinary, gold tiger eye in fine clean silica sand, at least 3" all around the slab.

Place the metal container in a cold oven and increase the temperature by 50 degrees every hour until it reaches 400 degrees. Then turn the oven off and **DO NOT OPEN THE DOOR**. Allow plenty of time for the container to cool all the way through. (If you heat treat tiger eye to sell **BE SURE** you let it be known it has been treated, it's only right and it's the law.)

There are natural occurrences that tiger eye can be found with red color. And other known ways have been from brush fires where the deposits are found and also when miners would build fires next to the seams to help crack it up into smaller pieces, remember most of these miners had nothing but hand tools to work with.

Not long after tiger eye was first discovered for lapidary the world famous Idar-Oberstein lapidaries discovered by using hydrochloric or oxalic acid they could bleach tiger eye to an evenly colored light, translucent yellow. When cut properly they produced "cats eye" stones that look much like the rare variety of chrysoberyl but can be distinguished very easily between the two by gemologists.

Other treatments but not usually done, never by me, but some do it. In pietersite and bighamite stones especially, it is very common to run into pits, cracks, or voids called vugs. These are sometimes filled with wax, super glue or opticon in the last steps of sanding and polishing the stone. I never do any of these treatments but as I said it is and has been done by others.

There are many other types of stones that display a "cats eye" or shimmering chatoyancy. The word "Chatoyant" comes from the French word for "cat" or to glow like a cat's eye. Tigereye is the anniversary gemstone for the 9th year of marriage

Editors Note: Remember tigereye has asbestos, so always use a face mask and/or keep tigereye under water when sanding and polishing.

LITTLE BALLS: Jewelry Bench Tips From: www.BradSmithJewelry.com & <http://amzn.to/1XoblsP> "Bench Tips for Jewelry Making" and "Broom Casting for Creative Jewelry" are available on Amazon

I often use little balls of silver and gold as accent pieces on my designs. They can be made as needed from pieces of scrap. Cut the scrap into little pieces, put them on a solder pad and melt them with a torch. Then throw the balls into a small cup of pickle. If you need to make all the balls the same size, you need the same amount of metal to melt each time. The best way to do that is to clip equal lengths of wire. But there's an easier way to get a good supply of balls. Some casting grain comes in near perfect ball form. Just grab your tweezers and pick out the ones you need. When you need larger quantities of balls, pour the casting grain out onto a baking pan, tilt the pan a bit, and let all the round pieces roll to the bottom. Bag the good ones, and pour the rest back into your bag for casting. Balls can be sorted into different sizes using multiple screens.
